

AUTENTICA

A kitchen system of excellence, with its original and innovative design, a perfect balance between tradition and future, where the great, authentic passion for wood and the sensitivity for the material which has always characterised the ideas and the work of Effeti, comes through. A “structured” kitchen which may be closer to tradition, in terms of the use of the material and the connection with wood and in the composition schemes, but is at the same time innovative, bourgeois and contemporary. The door is made up of a shaped frame which is also the continuous handle on all the sides of the door.
