

UNIKA

Unika comes from Effeti technological research in the application of aluminium in the kitchen: the particular processing of the door, the result of Effeti experience, is highlighted by the aluminium perimeter profile which is both handle as well as a discreet decoration and allows various materials and Finishings to be brought within its own perimeter. An interpretation of the classical frame in a contemporary and technological guise, subtle and light, a refined but simple design where technology is present without any flaunting

REGISTERED MODEL

UNIKA Door

Matt laminate

Thickness 23 mm

Idro Verde wood chipboard panel class E1 low formaldehyde emission (high humidity resistance), surface coated in HPL laminate with aluminium edges chemical silver finish.

Matt | Glossy lacquered

Thickness 23 mm

MDF Idro Verde panel class E1, low formaldehyde emission, painted with polyester base and polyurethane finish with spray application of four coats of paint crossing for each face of the panel.

The door with aluminium edge in strong thickness.

The glossy lacquering undergoes a further process of brushing with respect to the matt lacquering.

The shininess of the finish is obtained by sanding the finish itself and polishing it with special abrasive pastes.

Wood

Thickness 23 mm

Idro Verde wood chipboard panel class E1 low formaldehyde emission (high humidity resistance), surface coated in glued wood veneer. The door with aluminium edge in strong thickness.

Glass

Thickness 23 mm

MDF Idro Verde class E1 panel, on which 3 mm thick tempered glass is fitted. Edges made of strong thickness profiled aluminium th.3 mm.

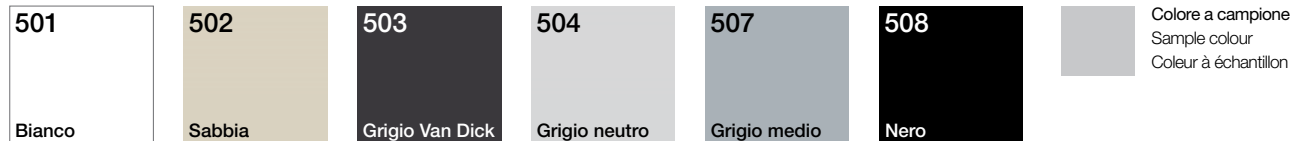

Primary drawn aluminium handle, galvanised to a strong thickness chemical silver finish.
